

CASE STUDY

Our Smartlockers offer **secure-Mobile storage** that complies with regulations specific to hazardous environments such as **refineries.**

Challenge

Hazardous environments in refineries like NAYARA require secure mobile storage due to the potential sparking hazards associated with mobile storage units.

Our Solution

Smart Mobile Lockers are to serve as an **innovative** solution to address the **mobile storage challenges** associated with traditional storage methods in hazardous environments. By leveraging **advanced technology** and **security features**, smart lockers can mitigate the risks posed by the possibility of spark generation through mobile usage at refineries.

Number of Lockers - 1600 Nos.

Locker Type - Metal

Lock Type - Duroolt Locks

Usage Type - Dynamic

Access Type - RFID card/ PIN/ Mobile OTP/ Face recognition

Benefits Of Solution

Industry-friendly : Minimize the risk of electric sparks and unauthorized access.

Enhanced Security : Advanced security features such as RFID card access, biometric authentication (face or thumb recognition).

Remote Management : The use of cloud technology enables remote monitoring and management of the entire locker inventory.

Data-Driven Insights : The MIS reports help optimize locker allocation and scalability.
